# **Assessment Doc**

# Project Assessment: Customer HubSpot Account Health

*3 Case Studies for Customer Success Managers & Account Managers*

## Core Learning Objectives

Account Health Monitoring | Customer Adoption | Churn Prevention | HubSpot CRM Proficiency

## Instructions to Students

Each case study below represents a real-world scenario you will encounter as a Customer Success Manager (CSM) or Account Manager (AM). You are required to read each scenario carefully, analyze the customer health signals, and submit a structured response as instructed.

For each case study, your submission must demonstrate:

- Your ability to interpret account health data within HubSpot
- Understanding of how poor adoption signals link to retention risk
- A proactive, data-informed customer success action plan
- Professional communication with internal stakeholders and the customer

## CASE STUDY 1 OF 3

## Danfo Digital Solutions — The Quiet Disengagement

*Sector: Last-Mile Logistics & Delivery Tech | Location: Lagos, Nigeria*

## Company Background

Danfo Digital Solutions is a Lagos-based startup that digitised last-mile delivery operations for small and medium-sized businesses across the Southwest geopolitical zone. Founded in 2020, Danfo Digital onboarded your company's SaaS CRM platform (HubSpot) 11 months ago on an Enterprise plan worth ₦1,800,000 annually. They initially purchased HubSpot to manage their growing fleet of delivery agents, track client relationships, and automate customer communications.

At the point of sale, Danfo Digital was excited. They deployed three departments on the platform: Sales, Operations, and Customer Experience. At the time of signing, they had 22 licensed users. Today, only 6 of those users log in regularly.

## Current HubSpot Account Health Data

The following metrics were pulled from the HubSpot Customer Health dashboard at the 11-month mark, one month before renewal:

| Health Metric                | Target / Benchmark | Current Status        | Health Signal                                                                                  |
|------------------------------|--------------------|-----------------------|------------------------------------------------------------------------------------------------|
| Active Users (Last 30 Days)  | 18+ of 22 (80%)    | 6 of 22 (27%)         |  Critical   |
| Deals Created (Last 30 Days) | 40+                | 9                     |  Critical   |
| Emails Logged via HubSpot    | 200+/month         | 31                    |  Critical   |
| Workflows Active             | 5+                 | 1                     |  At Risk    |
| Last CSM Check-in Call       | Monthly            | 73 days ago           |  Critical   |
| Support Tickets Raised       | 0-2 (healthy)      | 0                     |  Monitor    |
| Feature Adoption Score       | 70%+               | 18%                   |  Critical |
| NPS Score (Last Survey)      | 40+                | 22                    |  At Risk  |
| Renewal Probability (AI)     | High               | 12% - Likely to Churn |  Critical |

### Internal Intelligence Note

Your manager flagged last week that Danfo Digital's COO, Chioma Okonkwo, recently attended a competitor demo day hosted by a rival CRM vendor. No formal notice of cancellation has been received, but the account shows all the hallmarks of silent churn.

## Additional Context

Your onboarding notes from Month 1 reveal that Danfo Digital's primary use case champion was their Head of Sales, Rotimi Adeleke. Rotimi left the company four months ago and was never formally replaced as the internal HubSpot champion. The Operations lead, Ngozi Eze, expressed frustration during a call six months ago that the platform “feels too complex for our drivers to use on the field.” No action was recorded in HubSpot following that call.

## Your Task

### Part A: Health Diagnosis

**Using the account health data provided, write a Customer Health Assessment Report for Danfo Digital. Your report must:**

1. Identify and classify each health metric as Critical, At Risk, or Healthy, providing a brief justification for each classification.
2. Explain what the collective picture of these signals tells you about Danfo Digital's current relationship with the product.
3. Link at least three specific metrics to a measurable adoption or retention risk. For example, connect low active users to the likelihood of non-renewal.
4. State clearly whether this account is at immediate churn risk and support your answer with data.

### Part B: Root Cause Analysis

Beyond the numbers, consider the qualitative signals in this case. Answer the following:

5. What is the most likely root cause of Danfo Digital's declining adoption? Identify at least two contributing factors.
6. What mistake(s) did the CSM team make during the customer's lifecycle that contributed to the current situation?
7. How does the absence of an internal champion affect account health, and what should have been done when Rotimi left?

### Part C: Recovery Action Plan in HubSpot

You are the assigned CSM. Outline a 30-day recovery plan. For each action, specify how you would document or execute it in HubSpot:

8. Draft the sequence of outreach activities (calls, emails, meetings) you would initiate, including who you would contact and why.
9. Describe which HubSpot tools you would use to track and manage this recovery (e.g., Tasks, Sequences, Health Scores, Notes, Deals pipeline).
10. Propose at least two re-engagement strategies tailored specifically to Danfo Digital's context (logistics sector, field workers, champion loss).
11. Describe how you would set up a HubSpot Task or Workflow to prevent this level of disengagement from recurring on this account.

### Part D: Stakeholder Communication

Write the following two documents:

12. An internal escalation email to your Head of Customer Success summarising the account health, the risk level, and your proposed recovery plan. This email should be professional, data-driven, and concise (maximum 300 words).
13. A re-engagement email to Ngozi Eze (Operations Lead, Danfo Digital) that opens the door to a conversation without alarming her or making the situation feel transactional. The tone should be warm, consultative, and solution-focused (maximum 250 words).

**Tip**

Strong answers will go beyond restating the numbers. The best CSMs interpret health signals as customer stories and build empathy-driven, commercially sound strategies. Show that you understand the human and business reality behind each data point.

CASE STUDY 2 OF 3

Owambe Pro Ltd — High Activity, Low Value

Sector: Events Management & Hospitality Tech | Location: Abuja, Nigeria

Company Background

Owambe Pro Ltd is an Abuja-based events technology company that provides end-to-end management software and logistics for large social and corporate events. The name, a nod to the Yoruba word for lavish celebrations, reflects the brand’s personality: vibrant, client-facing, and fast-moving.

They signed on to a HubSpot Professional plan (₦950,000/year) eight months ago after a competitor recommended the platform. Their goal was to build a robust sales pipeline for corporate event contracts and automate follow-up communications with potential clients (called “guest contacts” internally). The account has 14 licensed users.

On the surface, Owambe Pro appears to be a thriving account. Login rates are strong, the team is active in HubSpot daily, and they have raised several support tickets showing engagement. However, your quarterly account review has revealed something troubling: despite all this activity, Owambe Pro has closed zero enterprise deals in the past six months and has not renewed a single major client contract through HubSpot.

Current HubSpot Account Health Data

| Health Metric                   | Target / Benchmark | Current Status | Health Signal |
|---------------------------------|--------------------|----------------|---------------|
| Active Users (Last 30 Days)     | 11+ of 14 (80%)    | 12 of 14 (86%) | ● Healthy     |
| Contacts Created (Last 90 Days) | 150+               | 847            | ● Healthy     |
| Deals in Pipeline               | 20+ active         | 68 deals open  | ● Healthy     |

|                                         |             |                    |            |
|-----------------------------------------|-------------|--------------------|------------|
| Deals Closed (Last 6 Months)            | 10+         | 0                  | ● Critical |
| Email Open Rate (Sequences)             | 25%+        | 6.2%               | ● Critical |
| Duplicate Contacts in CRM               | <5%         | 41%                | ● Critical |
| Deal Stages with Stale Deals (>60 days) | 0           | 34 deals           | ● Critical |
| Workflows Properly Configured           | 5+          | 2 (3 broken)       | ● At Risk  |
| HubSpot Academy Certifications          | 2+ per user | 0 across all users | ● At Risk  |
| NPS Score (Last Survey)                 | 40+         | 31                 | ● At Risk  |

### CSM Observation Note

During a recent shadow session with the Owambe Pro Sales team, you observed that the team creates a new contact record every time they speak to a prospect, even if the prospect is already in the system. Deal stages are being moved forward based on internal optimism rather than actual customer signals. The team has been using HubSpot as a filing cabinet, not as a revenue tool.

## Additional Context

The CEO, Babatunde Fashola-Coker (not affiliated with the former governor), recently sent your company an email asking why his team “spends all day in HubSpot” but has nothing to show for it commercially. He has cc’d your Head of Customer Success and is requesting a formal review meeting in two weeks. He mentioned that his board is questioning whether the HubSpot investment makes sense for their business.

Your product adoption data also shows that Owambe Pro has never used the Reporting & Analytics module, has not set up a single Sales Dashboard, and does not track any revenue-linked KPIs in the platform.

## Your Task

### Part A: Misuse vs. Non-Use Diagnosis

This case presents a nuanced challenge: the account shows high activity but poor outcomes. This is sometimes called ‘busy but broken’ adoption. Address the following:

14. Differentiate between activity metrics (vanity metrics) and outcome metrics (value metrics) using examples from the data provided. Which category does Owambe Pro's current HubSpot usage fall into?
15. Explain the concept of 'feature adoption vs. value adoption' and how it applies to Owambe Pro.
16. What specific HubSpot behaviours in this account indicate that the team is using the tool incorrectly? List at least four observations and explain the downstream impact of each.
17. Despite the surface activity, is this account at churn risk? Justify your answer.

## **Part B: Re-training and Re-adoption Plan**

Owambe Pro needs a structured re-onboarding. Design an adoption recovery plan:

18. Propose a 6-week HubSpot re-onboarding roadmap for Owambe Pro. Break it into phases and specify what will be addressed in each phase.
19. Identify which HubSpot features should be prioritised for immediate re-training based on their commercial impact (e.g., pipeline management, reporting, sequences).
20. Recommend at least two HubSpot Academy courses or certifications that the Owambe Pro team should complete. Justify your recommendations.
21. Describe how you would use HubSpot's internal tools (e.g., Lists, Workflows, Properties) to help Owambe Pro clean up their CRM data before re-training.

## **Part C: Proving ROI and Saving the Account**

The CEO wants to understand the commercial value of HubSpot. Address the following:

22. How would you use HubSpot's Reporting and Analytics module to build a business case for the platform's ROI? Describe the specific reports or dashboards you would create.
23. Propose a 90-day success metric framework for Owambe Pro: what outcomes (not activities) should they be measuring at the 30-, 60-, and 90-day marks?
24. What conversation would you have with Babatunde before the board review meeting? Outline the key points, tone, and objectives of that conversation.

## **Part D: Executive Stakeholder Presentation Outline**

Prepare a structured outline for a 20-minute executive review presentation to Babatunde Fashola-Coker and his board. Your outline must include:

25. A frank but constructive assessment of how HubSpot has been used to date (no sugarcoating, but no blame either).
26. A clear explanation of what 'healthy adoption' looks like for an events management company.
27. A forward-looking success plan with measurable 90-day milestones.
28. A risk/reward statement: what happens if they continue as-is vs. what is possible with proper adoption.

### **Tip**

This case tests your ability to handle a commercially dangerous but misdiagnosed account. The best CSMs know that high activity without business outcomes is just as risky as low activity. Demonstrate that you can have honest, value-driven conversations with senior stakeholders without being defensive about your product.

## CASE STUDY 3 OF 3

# Zikoko & Partners Consulting — The Expansion Opportunity Hidden in Plain Sight

Sector: Management Consulting & Professional Services | Location: Enugu, Nigeria

## Company Background

Zikoko & Partners Consulting is one of Southeast Nigeria's most respected mid-sized management consulting firms, serving clients in banking, FMCG, and the public sector. With a team of 38 professionals, the firm has been on HubSpot's Starter plan (₦480,000/year) for 18 months.

They originally purchased HubSpot primarily for contact management and basic email marketing. At the time, they had 8 licensed users, all within the Business Development team. Eighteen months in, the firm has organically grown its usage: consultants outside the BD team have started requesting access, the Managing Partner has begun asking about reporting capabilities, and there is internal chatter about using HubSpot for client project tracking.

However, the account has been largely self-managed. No formal QBR (Quarterly Business Review) has ever been conducted. The CSM assigned to the account changed twice in 18 months, with gaps in between. Zikoko & Partners have never formally complained, and their NPS score is consistently strong.

## Current HubSpot Account Health Data

| Health Metric               | Target / Benchmark | Current Status | Health Signal |
|-----------------------------|--------------------|----------------|---------------|
| Active Users (Last 30 Days) | 6+ of 8 (75%)      | 8 of 8 (100%)  | ● Excellent   |
| Contacts Managed in CRM     | 500+               | 1,240          | ● Excellent   |
| Email Campaign Open Rate    | 25%+               | 38.6%          | ● Excellent   |

|                                           |                            |                             |                                                                                                      |
|-------------------------------------------|----------------------------|-----------------------------|------------------------------------------------------------------------------------------------------|
| Features Used vs. Available (Starter)     | 60%+                       | 91%                         |  Excellent        |
| Informal Requests for Unlocked Features   | N/A                        | 14 internal requests logged |  Expansion Signal |
| QBRs Conducted                            | Quarterly (4 in 18 months) | 0                           |  Gap              |
| Users Beyond Original 8 Requesting Access | N/A                        | 9 new users pending         |  Expansion Signal |
| Plan Utilisation Ceiling                  | Below 80%                  | 91% — hitting plan limits   |  Upgrade Needed   |
| Last CSM-Led Strategic Conversation       | Quarterly                  | Never formally held         |  Gap              |
| Renewal Date                              | N/A                        | In 6 weeks                  |  Urgent           |

### Growth Intelligence Note

The firm's Managing Partner, Adaeze Zikoko-Obi, mentioned in a casual email to your support team last month: 'We've outgrown what we bought. We need someone to show us what else HubSpot can do for a firm like ours.' This email was filed as a support ticket and never escalated to the CSM team.

## Additional Context Three competing scenarios are now

### in play simultaneously:

- Renewal is in 6 weeks and no proactive outreach has been made by the CSM team.
- There is a clear commercial opportunity to upgrade Zikoko & Partners from Starter to Professional or Enterprise, which would increase ARR from ₦480,000 to approximately ₦1,600,000.
- The firm has 9 new users waiting for access, a use case for client project tracking, and a Managing Partner actively seeking a strategic conversation — none of which have been responded to.

A competitor CRM vendor has reportedly reached out to the firm's IT manager following a LinkedIn post about their growth. If Zikoko & Partners upgrades with the competitor instead of with your company, your business loses both the current revenue and the expansion opportunity.

## Your Task

### Part A: Health Interpretation and Opportunity Mapping

**This is a healthy account with expansion potential. Analyse the account accordingly:**

29. Classify the overall account health of Zikoko & Partners. Which signals point to a loyal, engaged customer, and which gaps represent risk to retention or expansion?
30. Define the concept of 'expansion revenue' in Customer Success and explain how account health data can surface expansion opportunities. Use Zikoko & Partners as your case example.
31. The Managing Partner's email was filed as a support ticket and ignored. What process failure does this represent? What should have happened instead, and what HubSpot tool or workflow could have prevented this gap?
32. Identify the competitor risk in this scenario. How does good account health monitoring help you detect and neutralise competitive threats before they materialise?

## **Part B: Expansion Strategy and Upsell Plan**

Develop a data-backed expansion strategy for Zikoko & Partners:

33. Using the account health data, build a business case for upgrading from HubSpot Starter to Professional. What specific features in the Professional plan would address the firm's stated needs? Be specific.
34. How would you structure a conversation with Adaeze Zikoko-Obi that positions the upgrade as a natural next step for the firm, not a sales push? Outline the key talking points.
35. What risks exist in this expansion conversation, and how would you mitigate them? Consider: budget objections, competitor interest, and the lack of prior QBRs.
36. Propose a mutual success plan (MSP) for the upgraded account. What would you commit to delivering in the first 90 days post-upgrade?

## **Part C: QBR Design and Account Governance**

The absence of QBRs represents a structural failure in account management. Address this:

37. Design the agenda for a first-ever Quarterly Business Review (QBR) with Zikoko & Partners. Include all sections, the data you would present, the questions you would ask, and the outcomes you would aim to achieve.
38. What HubSpot objects, properties, and views would you set up to ensure Zikoko & Partners always has an assigned CSM who is fully briefed on account history?
39. Create a CSM handover checklist (minimum 10 items) that should be completed any time an account like Zikoko & Partners changes CSM, to ensure continuity of service and relationship.

## **Part D: Renewal and Expansion Email Campaign**

With renewal in 6 weeks and an expansion opportunity on the table, write the following:

40. A personalised renewal email to Adaeze Zikoko-Obi that acknowledges the firm's growth, references their platform utilisation, and sets up a discovery call about next steps. Tone: warm, expert, partner-level (maximum 300 words).
41. An internal account briefing note to your VP of Customer Success summarising the account status, the expansion opportunity, the competitive threat, and your recommended next actions. Include a proposed commercial outcome (maximum 400 words).
42. Describe how you would use HubSpot Sequences to nurture Adaeze through the renewal and upgrade decision over the next 6 weeks. Outline the sequence: number of steps, channel (email/call/LinkedIn), timing, and content theme for each step.

### Tip

Case Study 3 tests a different kind of CSM skill: the ability to recognise and mobilise a growth opportunity before it becomes a risk. The best answers will demonstrate commercial acumen, consultative selling skills, and a deep understanding of how account health data connects to revenue outcomes. Avoid generic answers, every recommendation should be anchored in the specifics of Zikoko & Partners.

***Good luck. Think like a CSM. Advocate for your customer.***

## Who Are We?

### Internal Task Framework

# **G4 HUBSPOT**

— P A R T N E R S —

HELP DESK

SUPPORT

SUPPORTING **SUCCESS.** DELIVERING **SOLUTIONS.**

T1

**Data Engineers**

HubSpot Configuration &amp; Property Setup

**YOUR ROLE**

You are the technical backbone. You configure HubSpot — building properties, health score frameworks, and data structures that make all other teams' work possible. The engineers who lay the rails before the train can run.

**TOOLS YOU OWN**

HubSpot Custom Properties, Calculated Properties, Health Score Builder, Company & Contact Records, HubSpot Data Model

**TASK ASSIGNED — PART A, NO. 1 — ★ HARD**

- Identify and classify each health metric as **Critical, At Risk, or Healthy**, providing a brief justification for each classification.

T2

**Analytics Team**

Data Interpretation &amp; Risk Insight

**YOUR ROLE**

You turn raw numbers into business stories. You interpret what the data means — clearly, persuasively, with commercial awareness. A health score of 6/100 is your canvas to explain.

**TOOLS YOU OWN**

HubSpot Reporting & Analytics, Custom Dashboards, Deal Pipeline Reports, Contact Activity Reports, MixPanel

**TASKS ASSIGNED — PART A — ★ HARD + PART D**

- **Part A, No. 2** — Explain what the collective picture of these signals tells you about Danfo Digital's current relationship with the product.
- **Part A, No. 3** — Link at least three specific metrics to a measurable adoption or retention risk. For example, connect low active users to the likelihood of non-renewal.
- **Part D, No. 12** — An internal escalation email to your Head of Customer Success summarising the account health, the risk level, and your proposed recovery plan. This email should be professional, data-driven, and concise (maximum 300 words).

T3

**Slack Moderators**

Internal Communication &amp; Team Coordination

**YOUR ROLE**

You manage the internal communication layer — ensuring every team knows what's happening, when deliverables are due, and where shared resources live. In a real CSM operation, Slack is where deals are saved or lost at 10pm.

**TOOLS YOU OWN**

Slack (channels, threads, reminders, workflow builder), team status updates, document sharing, meeting summaries

**TASKS ASSIGNED — PARTS A & B**

- **Part A, No. 4** — State clearly whether this account is at immediate churn risk and support your answer with data.
- **Part B, No. 5** — What is the most likely root cause of Danfo Digital's declining adoption? Identify at least two contributing factors.

T4

**ClickUp Moderators**

Project Management &amp; Task Tracking

**YOUR ROLE**

You are the operational engine — tracking who owes what, by when, making sure nothing falls through. You use ClickUp to manage the G4 project timeline, flag blockers, and keep deliverables on track.

**TOOLS YOU OWN**

ClickUp (task lists, deadlines, assignees, status tracking, progress dashboards), project timelines, dependency mapping

**TASKS ASSIGNED — PART B**

- **Part B, No. 6** — What mistake(s) did the CSM team make during the customer's lifecycle that contributed to the current situation?
- **Part B, No. 7** — How does the absence of an internal champion affect account health, and what should have been done when Rotimi left?

T5

**Website Production**

Digital Presence, Assets &amp; Client-Facing Materials

**YOUR ROLE**

You handle everything the client sees — websites, landing pages, digital assets, and visual materials that represent G4 professionally. You build customer-facing touchpoints: onboarding portals, resource hubs, proof-of-value materials.

**TOOLS YOU OWN**

HubSpot CMS Hub, Design tools, Freshdesk ticketing integration, G4 public-facing pages (who we are, what we do, pricing)

**TASKS ASSIGNED — PART C + PART D**

- **Part C, No. 8** — Draft the sequence of outreach activities (calls, emails, meetings) you would initiate, including who you would contact and why.
- **Part C, No. 9** — Describe which HubSpot tools you would use to track and manage this recovery (e.g., Tasks, Sequences, Health Scores, Notes, Deals pipeline).
- **Part D, No. 13** — A re-engagement email to Ngozi Eze (Operations Lead, Danfo Digital) that opens the door to a conversation without alarming her or making the situation feel transactional. The tone should be warm, consultative, and solution-focused (maximum 250 words).

T6

**Workflow Moderators**

HubSpot Automation, Sequences &amp; Process Design

**YOUR ROLE**

You design automated systems that make a CSM operation scalable. Workflows replace manual vigilance with systematic accountability — automatically flagging at-risk accounts, triggering outreach, ensuring no customer ever goes 73 days without contact again.

**TOOLS YOU OWN**

HubSpot Workflows, Sequences, Task automation, Email triggers, Notion for process documentation

**TASKS ASSIGNED — PART C - NO. 11 ★ HARD**

- **Part C, No. 10** — Propose at least two re-engagement strategies tailored specifically to Danfo Digital's context (logistics sector, field workers, champion loss).
- **Part C, No. 11** — Describe how you would set up a HubSpot Task or Workflow to prevent this level of disengagement from recurring on this account.

## Presentation Team

T7

Decks, Stakeholder Comms & Executive Storytelling

### YOUR ROLE

You are the communicators and the face of the group. Every great CSM strategy is only as powerful as the stakeholder who hears it. You will represent the larger group — interfacing with every team, attending their meetings, and ensuring you understand both the context and the content of each section so deeply that even if the slides go off, you can present entirely from memory. You own the stage.

### TOOLS YOU OWN

PowerPoint / Google Slides, Canva, Notion, G-Drive document repository, email drafting, executive briefing formats, Slack, Up.pptx as reference standard

### TASK ASSIGNED — PRESENTATION OWNERSHIP & CROSS-TEAM LIAISON

#### — Cross-Team Liaison & Presentation

**Mastery** — Attend every team meeting across T1–T8. Understand the full depth of each team's work — their data, their reasoning, and their deliverables. Ensure total familiarity with the presentation from opening to closing: context, numbers, narrative, and recommendations. Your standard is this: if the projector fails and the slides disappear, you and your team must be able to deliver the entire presentation from memory — with full confidence, accuracy, and ownership. Show that the content belongs to you, not just the slides.

## Other Creatives

T8

Innovation, Local Insight & Value-Add Contributions

### YOUR ROLE

You are the wild card — and that is a compliment. You bring creative thinking, local Lagos/Nigeria context, lateral ideas, and supplementary materials that elevate the project from good to exceptional. You will also represent the larger group in spaces where creative and strategic insight is needed. Ekwy will notice.

### TOOLS YOU OWN

G-Drive (GEM knowledge library), Notion, design tools, local research on Lagos logistics market and SME landscape in Southwest Nigeria

### TASKS ASSIGNED — REPORTING, CREATIVITY & KNOWLEDGE BASE

- **Group Reporting Assembly** — Collect completed deliverables and reports from all teams (T1–T7) and assemble them into the provided reporting document, ensuring all contributions are structured, accurate, and presented cohesively as one unified group submission.
- **Lagos Logistics Creativity** — Contribute local market innovation and creative insights: Lagos logistics context, SME client showcase template, and any other curiosity-triggering ideas that add real-world depth and local relevance to the project.
- **Knowledge Base Ownership** — Take full responsibility for the G-Drive repository structure for the group's knowledge base, or equivalent workspace tool — ensuring all group materials are organised, clearly labelled, accessible to all members, and maintained throughout the entire project lifecycle.

# **What We Do & Who We Serve**

## EXECUTIVE SUMMARY

We help African businesses implement CRM systems that improve customer engagement, retention, automation, and operational efficiency. We bridge the service gap with SMEs working in partnership with HubSpot company. Our Goal is to give top-notch service to our customers and make them feel HubSpot moments. As an SME, we met challenges resulting in lessons that changed our structure and value. We moved from treating CSM as a job function that could be annexed to Sales to operating CSM as a Core Business function. This helped us detect possible churn indices, reengage with our customers offering strong CSP, providing valued services that drive adoptions, circumvent churn, build for retention and expansion

# Turn Your CRM Into a Revenue Engine

# Executive Summary

---

This report presents Group G4's comprehensive Customer Success Management assessment of Danfo Digital Solutions, a Lagos-based last-mile logistics startup and Enterprise HubSpot client with an annual contract value of ₦1,800,000. The assessment was conducted at the 11-month mark, one month before renewal.

Danfo Digital Solutions is in a state of critical, silent churn. Of nine health metrics evaluated, six are classified as Critical, two as At Risk, and zero as Healthy. The AI-predicted renewal probability stands at 12%. The COO attended a competitor demo day, no internal champion has existed for four months, and the CSM has not conducted a check-in call in 73 days.

**KEY FINDINGS**  
Active Users: 6/22 (27%) · Feature Adoption: 18% · Last CSM Call: 73 days ago · NPS: 22 ·  
Renewal Probability: 12% · Support Tickets: 0 formal (1 unlogged verbal complaint —  
reclassified Critical)

The root cause is a product-context mismatch compounded by CSM operational failure. HubSpot Enterprise was deployed to a field-based logistics workforce without sector-specific configuration or mobile-first adaptation. When the platform's only internal champion resigned, no succession plan was activated.

This report details a structured 30-day recovery plan, a disengagement prevention workflow, two stakeholder communications, a full evidence register, and 3 landscape tool evidence pages covering Slack, ClickUp, Calendar, and HubSpot CRM. The intervention window remains open. Decisive action within 72 hours is required to prevent confirmed churn.

# 1. Problem Definition

---

## 1.1 Company Profile

|                |                                                                  |
|----------------|------------------------------------------------------------------|
| Founded        | 2020 — Lagos, Nigeria                                            |
| Sector         | Last-Mile Logistics & Delivery Technology                        |
| HubSpot Plan   | Enterprise — ₦1,800,000 per annum                                |
| Onboarded      | 11 months ago — renewal due in 30 days                           |
| Licensed Users | 22 seats — only 6 active today (27%)                             |
| Departments    | Sales · Operations · Customer Experience                         |
| Champion       | Rotimi Adeleke (Head of Sales) — left 4 months ago, not replaced |
| Key Contacts   | Chioma Okonkwo (COO) · Ngozi Eze (Operations Lead)               |

## 1.2 The Problem Statement

Danfo Digital Solutions purchased HubSpot Enterprise to manage a growing fleet of delivery agents, track client relationships, and automate customer communications. Eleven months after onboarding, the platform is effectively abandoned. The company has reverted to informal communication tools and manual processes, and its senior leadership is actively evaluating a competing CRM vendor.

**THE CORE PROBLEM IN ONE SENTENCE**

Danfo Digital Solutions paid ₦1,800,000 for a platform that was never configured to work for the people who needed to use it most — and when they said so, nobody listened.

## PART A

# Account Health Assessment

Tasks 1–4 · T1 Data Engineers · T2 Analytics Team · T3 Slack Moderators

## 2. Account Health Assessment

**PART A · TASK 1** Assigned to: **T1 — Data Engineers**

*Identify and classify each health metric as Critical, At Risk, or Healthy, providing a brief justification for each classification.*

### 2.1 Health Metric Classification — Full Table with Justifications

| Health Metric                | Target          | Current Status          | Classification      | Justification                                                                                                  | Pillar        |
|------------------------------|-----------------|-------------------------|---------------------|----------------------------------------------------------------------------------------------------------------|---------------|
| Active Users (Last 30 Days)  | 18+ of 22 (80%) | 6 of 22 (27%)           | ● Critical          | Only 27% of licensed users active — far below 80% benchmark. Platform effectively abandoned by 16 of 22 users. | Product Usage |
| Deals Created (Last 30 Days) | 40+             | 9                       | ● Critical          | 22% of target. Sales team has stopped using HubSpot to log business activity.                                  | Engagement    |
| Emails Logged via HubSpot    | 200+ / month    | 31                      | ● Critical          | Only 15% of benchmark. Communications are happening outside HubSpot.                                           | Engagement    |
| Workflows Active             | 5+              | 1                       | ● At Risk           | Minimal automation deployed. Only 1 of required 5+ workflows active.                                           | Product Usage |
| Last CSM Check-in Call       | Monthly         | 73 days ago             | ● Critical          | Over 2× the allowed gap. No active CSM relationship during the most critical renewal period.                   | Engagement    |
| Support Ticket Activity      | 0–2 formal      | 0 logged / 1 unrecorded | ● Critical (Hidden) | Zero tickets signals broken feedback loop. Ngozi Eze's                                                         | Support       |

| Health Metric            | Target | Current Status        | Classification | Justification                                                               | Pillar        |
|--------------------------|--------|-----------------------|----------------|-----------------------------------------------------------------------------|---------------|
|                          |        |                       |                | verbal complaint was never logged — a formal process failure.               |               |
| Feature Adoption Score   | 70%+   | 18%                   | ● Critical     | Only 18% of features used. Customer is not experiencing platform value.     | Product Usage |
| NPS Score (Last Survey)  | 40+    | 22                    | ● At Risk      | Passive zone. Declining trajectory risks crossing into Detractor territory. | Sentiment     |
| Renewal Probability (AI) | High   | 12% — Likely to Churn | ● Critical     | HubSpot AI gives 88% churn probability. Highest risk classification.        | Sentiment     |

#### SUPPORT TICKET RECLASSIFICATION — CRITICAL (HIDDEN)

Zero formal tickets alongside 73% user dropout does not signal satisfaction. It signals the feedback loop has broken down. Ngozi Eze's verbal complaint ('feels too complex for our drivers') constitutes an unlogged support ticket. CSM best practice: every verbal complaint on a call must become a formal ticket. If it is not logged, it did not happen.

#### PART A · TASK 2 Assigned to: T2 — Analytics Team

*Explain what the collective picture of these signals tells you about Danfo Digital's current relationship with the product.*

## 2.2 Collective Health Picture

These nine metrics tell one coherent story: Danfo Digital purchased a tool for ambition, but the tool was never made to fit their reality. User logins have collapsed 73%. Emails logged sit at 15% of target. Deals created at 22% of target. The customer has not abandoned HubSpot dramatically — they have withdrawn quietly, department by department, user by user, over eleven months of unaddressed friction and absence of CSM relationship.

| Signal Cluster               | What It Tells Us                                                                                                                                                     |
|------------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Platform Abandonment         | Active users (27%), emails logged (15%), deals created (22%) — teams have stopped working in HubSpot and reverted to WhatsApp, spreadsheets, and calls.              |
| Lost Institutional Knowledge | Feature adoption at 18% with 1 active workflow means Danfo never moved past surface-level setup. When Rotimi left, institutional memory left with him.               |
| CSM Relationship Failure     | 73 days without a check-in near renewal is the loudest signal. Problems festered for over two months with no intervention — a dereliction of the CSM's duty of care. |
| Broken Feedback Loop         | Zero support tickets does not mean satisfaction. Ngozi's unlogged complaint proves the feedback mechanism failed completely.                                         |

**PART A · TASK 3** Assigned to: **T2 — Analytics Team**

***Link at least three specific metrics to a measurable adoption or retention risk.***

## 2.3 Metric-to-Risk Linkage

**RISK LINK 1 — ACTIVE USERS 27% → NON-RENEWAL RISK: VERY HIGH**

At 27%, Danfo's finance team can calculate they are paying ₦1.8M for a tool 16 of 22 staff have stopped using. The ROI case for renewal collapses. Accounts below 40% active users churn at 3× the rate of those above 70%.

**RISK LINK 2 — FEATURE ADOPTION 18% → VALUE PERCEPTION RISK: EXTREME**

At 18% feature adoption, Danfo cannot articulate what the platform does for their business. No internal champion can build the case for staying when the COO questions the investment.

**RISK LINK 3 — LAST CSM CALL 73 DAYS → RELATIONSHIP RISK: UNRECOVERABLE WITHOUT ACTION**

Accounts with no CSM contact for 60+ days churn at 4× the rate of engaged accounts. Every additional day of silence increases probability of an unrecoverable outcome.

**RISK LINK 4 — NPS 22 → WORD-OF-MOUTH & PIPELINE RISK**

NPS 22 is the Passive segment. Without intervention this crosses into Detractor. A churned Danfo spreading negative sentiment in Lagos's logistics ecosystem directly damages G4's acquisition pipeline.

**PART A · TASK 4** Assigned to: **T3 — Slack Moderators**

***State clearly whether this account is at immediate churn risk and support your answer with data.***

**VERDICT: YES — DANFO DIGITAL IS AT IMMEDIATE AND CRITICAL CHURN RISK**

Five signals converge simultaneously: 1. Renewal Probability (AI): 12% — 88% churn probability. 2. COO attended a competitor CRM demo day — actively evaluating alternatives. 3. Zero CSM contact in 73 days with renewal in 30 days. 4. No internal champion for 4 months — no advocate in boardroom conversations. 5. Renewal is one month away — internal decision has likely already begun. The account has not formally cancelled. This is the intervention window. It is narrow and it is closing.

## PART B

# Root Cause Analysis

Tasks 5–7 · T3 Slack Moderators · T4 ClickUp Moderators

## 3. Root Cause Analysis

### PART B · TASK 5 Assigned to: T3 — Slack Moderators

*What is the most likely root cause of Danfo Digital's declining adoption? Identify at least two contributing factors.*

#### PRIMARY ROOT CAUSE

A product-context mismatch that was never resolved at onboarding. Danfo's front-line users are drivers, dispatch riders, and field operatives operating on mobile devices in Lagos traffic. HubSpot Enterprise, designed for office-based teams, was deployed to this workforce without meaningful adaptation.

#### CONTRIBUTING FACTOR 1 — WRONG CONFIGURATION FOR A FIELD WORKFORCE

HubSpot set up as a desktop-first CRM requiring complex data entry. Ngozi Eze explicitly flagged this: 'feels too complex for our drivers to use on the field.' Last-mile logistics requires mobile-first, simplified interfaces — delivery confirmation in 2 taps, not 12-field form submissions.

#### CONTRIBUTING FACTOR 2 — CHAMPION DEPENDENCY WITHOUT SUCCESSION PLANNING

Entire platform adoption was carried by one person — Rotimi Adeleke. No secondary champion developed. No knowledge transfer conducted. When Rotimi left, institutional memory left with him.

#### CONTRIBUTING FACTOR 3 — GENERIC ONBOARDING IN A SPECIALIST SECTOR

Standard HubSpot onboarding teaches generic features. Danfo needed sector-specific training: delivery batch tracking, SME client management in Lagos's market, automated SMS delivery updates.

### PART B · TASK 6 Assigned to: T4 — ClickUp Moderators

*What mistake(s) did the CSM team make during the customer's lifecycle that contributed to the current situation?*

#### MISTAKE 1 — NO ACTION AFTER NGOZI'S FRUSTRATION CALL (6 MONTHS AGO)

When the Operations Lead raised a specific complaint — platform too complex for field workers — the CSM took the call and recorded nothing. No Task created. No follow-up. No adaptation. This single failure cascaded into everything that followed.

#### **MISTAKE 2 — NO CHAMPION SUCCESSION PLAN WHEN ROTIMI LEFT**

When the primary internal contact resigned, no alarm raised, no escalation filed, no outreach to identify a replacement. Champion departure is a Category 1 churn risk signal requiring automatic escalation. It did not happen.

#### **MISTAKE 3 — 73 DAYS WITHOUT A CHECK-IN NEAR RENEWAL**

Standard CSM practice requires monthly check-ins. A 73-day blackout with renewal 30 days away is a critical governance failure. The account was unmanaged during its most vulnerable period.

#### **MISTAKE 4 — GENERIC ONBOARDING FOR A SPECIALIST LOGISTICS WORKFORCE**

The initial onboarding was not customised to Danfo's operational context. Mobile workflows, field-friendly dashboards, and delivery tracking integrations should have been configured from Month 1.

#### **PART B · TASK 7** Assigned to: **T4 — ClickUp Moderators**

***How does the absence of an internal champion affect account health, and what should have been done when Rotimi left?***

An internal champion is the CSM's proxy inside the customer organisation — training colleagues, defending the platform budget in board meetings, surfacing adoption problems early. Without one, the CSM is flying blind.

#### **What should have happened within 5 days of Rotimi's departure:**

1. CSM to contact COO formally, acknowledge the transition, and request a stakeholder mapping call
2. Identify 2–3 potential replacement champions across Sales, Operations, and Customer Experience
3. Schedule a Champion Onboarding session to transfer Rotimi's institutional knowledge
4. Log a 'Champion At Risk' flag in HubSpot and trigger internal escalation to the CSM Manager
5. Increase check-in frequency from monthly to bi-weekly for 60 days to stabilise the relationship

## PART C

# Recovery Action Plan in HubSpot

Tasks 8–11 · T5 Website Production · T6 Workflow Moderators

## 4. Recovery Action Plan in HubSpot

### PART C · TASK 8 Assigned to: T5 — Website Production

*Draft the sequence of outreach activities (calls, emails, meetings) you would initiate, including who you would contact and why.*

### 4.1 30-Day Outreach Sequence

| Timeline | Contact              | Activity                  | Actions & Goals                                                                                                                                        | HubSpot Log                                                                                                |
|----------|----------------------|---------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------|------------------------------------------------------------------------------------------------------------|
| Day 1–2  | Internal             | Escalation                | File escalation to Head of CS. Pull full account history. Create Churn Recovery Deal in pipeline. Brief CSM Manager on competitor intelligence.        | Create Deal. Tag: Churn Risk: Critical. Log internal Note.                                                 |
| Day 3    | Ngozi Eze — Ops Lead | Re-engagement Call        | Listening call — understand pain points. Position HubSpot Mobile App as solution to field complexity. Do NOT mention renewal.                          | Log as Activity. Create Task: Send mobile guide within 24hrs. Tag: Potential Champion.                     |
| Day 4    | Chioma Okonkwo — COO | Executive Email           | Personalised email referencing Danfo's growth in Southwest logistics. Request 20-minute Strategic Review.                                              | Enrol in 3-step executive Sequence. Log: Executive Stakeholder — Renewal Decision Maker.                   |
| Day 7–10 | All Stakeholders     | Executive Business Review | 45-min session. Review original goals vs. current state. Demo HubSpot Mobile App with Danfo-specific pipeline. Secure 30-day re-engagement commitment. | Create Meeting record. Attach EBR deck. Log outcomes as Note. Create Tasks for all agreed next steps.      |
| Day 14   | All 22 Users         | Training Workshop         | 90-min mobile-first workshop. HubSpot Mobile App for drivers. Quick Reference cards in English and Pidgin. Designate new internal champion.            | Enrol all 22 in HubSpot Academy. Create List: Danfo — Active Post-Training. Set weekly active user digest. |
| Day 21   | COO                  | Renewal Negotiation       | Present 3-week progress data. Frame renewal as investment in what is now working. Commercial offer ready if needed.                                    | Update Deal stage. Log negotiation outcomes.                                                               |

| Timeline  | Contact     | Activity              | Actions & Goals                                                                                                        | HubSpot Log                                                                             |
|-----------|-------------|-----------------------|------------------------------------------------------------------------------------------------------------------------|-----------------------------------------------------------------------------------------|
| Day 28–30 | COO + Legal | Close or Managed Exit | If renewed: build 90-day Mutual Success Plan. If churned: exit interview, log intelligence, trigger win-back Sequence. | Update Deal: Renewal Won or Churned. Create 12-month Success Plan or win-back Sequence. |

**PART C · TASK 9** Assigned to: **T5 — Website Production**

*Describe which HubSpot tools you would use to track and manage this recovery.*

| HubSpot Tool                    | Specific Use in Danfo Recovery                                                                                |
|---------------------------------|---------------------------------------------------------------------------------------------------------------|
| <b>Tasks</b>                    | Every call outcome and commitment logged as a Task with due date and owner.                                   |
| <b>Sequences</b>                | Two sequences: (1) 3-step executive re-engagement for COO Chioma. (2) Post-training nurture for all 22 users. |
| <b>Health Score Property</b>    | Custom Health Score (0–100) updated daily. Target: move from 6/100 to 45/100 within 30 days.                  |
| <b>Notes &amp; Call Logs</b>    | Every conversation logged within 2 hours — sentiment, objections, commitments, next action.                   |
| <b>Deals Pipeline</b>           | 'Churn Recovery' Deal: Contacted → EBR Held → Trial Committed → Renewed/Churned. ARR at risk: ₦1,800,000.     |
| <b>Workflows</b>                | Automated weekly digest of Danfo's active user count, deals created, and emails logged.                       |
| <b>Contact Lists</b>            | Dynamic Lists: 'Danfo — Inactive 14 Days,' 'Danfo — Post-Training Active,' 'Danfo — Decision Makers.'         |
| <b>Reports &amp; Dashboards</b> | Custom 'Danfo Recovery Dashboard' — all 9 health metrics in real time, shared with CSM Manager.               |

**PART C · TASK 10** Assigned to: **T6 — Workflow Moderators**

*Propose at least two re-engagement strategies tailored specifically to Danfo Digital's context.*

**STRATEGY 1 — MOBILE-FIRST LOGISTICS PLAYBOOK**

Build a Danfo-specific 'Field Operations Playbook' for HubSpot Mobile App — delivery confirmation, client updates, and communication triggers from a smartphone in under 60 seconds. Directly addresses Ngozi Eze's stated complaint. HubSpot: Simplified 5-field Contact view, Mobile App push notifications, 'Delivery Completed' mobile form that auto-logs an Activity.

**STRATEGY 2 — INTERNAL CHAMPION PROGRAMME**

Nominate Ngozi Eze as lead champion candidate. Provide: bi-weekly CSM office hours, HubSpot Academy certification, a custom 'Danfo Operations Dashboard' she can present to the COO, and a direct WhatsApp channel to the CSM for fast support. HubSpot: Super Admin read access, Champion Status custom property.

### STRATEGY 3 — LAGOS LOGISTICS ROI STORY

Build a live ROI dashboard for Danfo: deliveries tracked, client relationships managed, time saved on manual communication. Present to Chioma Okonkwo as a data gift — not a sales pitch. HubSpot: Custom Report using Contact Activity and Deal data. PDF export scheduled to auto-send to Chioma monthly.

#### PART C · TASK 11 Assigned to: T6 — Workflow Moderators

*Describe how you would set up a HubSpot Task or Workflow to prevent this level of disengagement from recurring on this account.*

## 4.2 Prevention Workflow — 'Enterprise Account Health Guardian'

| Step     | Node Type                               | Logic & Action                                                                                                      |
|----------|-----------------------------------------|---------------------------------------------------------------------------------------------------------------------|
| TRIGGER  | Recurring — Every Monday 8am            | All Enterprise accounts where Account Status ≠ Churned. Runs weekly without manual activation.                      |
| BRANCH A | Active Users < 50%                      | Create Task: '⚠ [Account] user adoption below 50% — review immediately.' Assigned to CSM Owner. Due: 48 hours.      |
| BRANCH B | Last CSM Call > 30 Days                 | Send internal email to CSM Owner AND CSM Manager: 'Check-in overdue. Last contact: [date]. Renewal in [X] days.'    |
| BRANCH C | Champion Empty or Inactive > 60 Days    | Create Task: '🚨 No internal champion. Escalate immediately.' Set: Champion Status = At Risk.                        |
| BRANCH D | Renewal < 60 Days AND Health Score < 40 | Escalate to CSM Manager + VP CS. Create Renewal Risk Deal. Trigger Executive Outreach Sequence to C-Suite.          |
| OUTPUT 1 | Update Health Score                     | Active Users (30%) + Feature Adoption (25%) + CSM Recency (20%) + Deals Created (15%) + NPS (10%). Log in timeline. |

## PART D

# Stakeholder Communications

Tasks 12–13 · T2 Analytics Team · T5 Website Production

## 5. Stakeholder Communications

PART D · TASK 12 Assigned to: T2 — Analytics Team

*An internal escalation email to your Head of Customer Success — professional, data-driven, concise (maximum 300 words).*

### 5.1 Internal Escalation Email

**To:** [Head of Customer Success]

**From:** [CSM Name] | G4 HubSpot Partners

**CC:** [CSM Manager]

**Subject:** 🚨 **URGENT: Danfo Digital — Critical Churn Risk | ₦1.8M ARR | Renewal in 30 Days**

Hi [Name], I am escalating Danfo Digital Solutions as a critical churn risk requiring immediate senior visibility and support.

**Account Overview:** HubSpot Enterprise · ₦1,800,000/yr · Renewal: 30 days · Last-Mile Logistics, Lagos

**Health Data:**

- Active Users: 6/22 (27%) — Target: 80%+
- Feature Adoption Score: 18% — Target: 70%+
- Last CSM Check-in: 73 days ago — Target: Monthly
- AI Renewal Probability: 12% — Likely to Churn
- NPS: 22 — Target: 40+
- Support Activity: 0 formal tickets — 1 unlogged verbal complaint (Ngozi Eze, 6 months ago)

**Risk Signals:**

6. Internal champion (Rotimi Adeleke) departed 4 months ago. No replacement identified.
7. Operations Lead expressed platform complexity concerns 6 months ago — no action recorded.
8. COO (Chioma Okonkwo) attended a competitor CRM demo day last week.

I am requesting your support for the EBR meeting (Day 7–10) and authorisation to offer a commercial concession if required at the renewal stage.

**[CSM Name] · G4 HubSpot Partners · Customer Success**

**PART D · TASK 13** Assigned to: **T5 — Website Production**

***A re-engagement email to Ngozi Eze — warm, consultative, and solution-focused (maximum 250 words).***

## 5.2 Re-Engagement Email to Ngozi Eze

**To:** Ngozi Eze — ngozi.eze@danfodigital.ng

**From:** [CSM Name] | G4 HubSpot Partners

**Subject:** Checking in — and something we built specifically for Danfo's team

Hi Ngozi, I hope things are going well with you and the team. Delivery season in Lagos never slows down — I imagine you are keeping the whole operation running at full speed! I wanted to reach out personally because I have been thinking about a conversation we had a while back. You raised something that stayed with me: that the platform felt complex for your drivers to use in the field. That was important feedback, and I want to be honest — we should have acted on it faster. I am sorry we did not. Here is why I am writing now: we have recently built out a simplified mobile workflow specifically designed for field operations teams in logistics — delivery confirmation, client updates, and communication triggers, all from a smartphone in under 60 seconds. I genuinely believe it is something your drivers could use daily without friction. I would love to walk you through it in a quick 20-minute call — no slides, no formalities. Just a practical look at whether this solves the challenge you raised. Would any time work for you next week? I will follow your lead on timing. With warm regards, [CSM Name] · G4 HubSpot Partners · Customer Success

## 6. Evidence Register — Known Sources

The following evidence items are confirmed sources referenced in this report. Each item is assigned a unique reference code for traceability.

| Ref   | Pillar        | Tool / Source                  | Evidence Description                                                                                         | Status                                                             |
|-------|---------------|--------------------------------|--------------------------------------------------------------------------------------------------------------|--------------------------------------------------------------------|
| E-001 | Product Usage | HubSpot Health Dashboard       | Active Users, Feature Adoption, Workflows, Emails Logged, Deals Created — all pulled at Month 11             | ☑ Confirmed — pulled from HubSpot Customer Health dashboard        |
| E-002 | Sentiment     | HubSpot AI Score               | Renewal Probability flagged at 12% — Likely to Churn                                                         | ☑ Confirmed — HubSpot Predictive Health Score                      |
| E-003 | Sentiment     | HubSpot NPS Tool               | NPS Score of 22 against target of 40+                                                                        | ☑ Confirmed — last survey result in HubSpot                        |
| E-004 | Engagement    | CSM Onboarding Notes           | Rotimi Adeleke identified as primary HubSpot champion at Month 1                                             | ☑ Confirmed — Month 1 CSM notes on record                          |
| E-005 | Support       | CSM Call Record (Unlogged)     | Ngozi Eze: 'platform feels too complex for our drivers to use on the field' — verbal complaint, 6 months ago | ⚠ Process Failure — complaint was never logged as a HubSpot ticket |
| E-006 | Engagement    | Internal CSM Manager Flag      | COO Chioma Okonkwo attended a competitor CRM demo day — flagged by manager last week                         | ☑ Confirmed — internal intelligence note                           |
| E-007 | Engagement    | HR / Internal Record           | Rotimi Adeleke (Head of Sales) departed 4 months ago — no champion replacement actioned                      | ☑ Confirmed — 4 months ago, no succession plan executed            |
| E-008 | Support       | HubSpot Service Hub            | Zero formal tickets raised in 11 months against a healthy 0–2 benchmark                                      | ☑ Confirmed — HubSpot ticket log reviewed                          |
| E-009 | All Pillars   | Digital Witch Case Study Brief | Full case study — Danfo Digital: The Quiet Disengagement (Case Study 1 of 3)                                 | ☑ Confirmed — Digital Witch CSM Programme brief                    |

### NOTE ON EVIDENCE E-005

This verbal complaint by Ngozi Eze was never logged in HubSpot. It is formally documented here as a support event and as a CSM process failure. All future verbal complaints must be converted to a formal HubSpot ticket within 24 hours.

## 7. Additional Evidence Register — Team Fillable

Teams: use the yellow rows below to document any additional evidence gathered during your research, tool usage, or practical application. Include screenshots in the Status column where possible.

**INSTRUCTIONS FOR TEAMS**  
Fill in all yellow cells. For the Status column: paste a screenshot directly into the cell, OR describe what the tool showed you, OR write 'Not applicable' if this row does not apply to your team's assigned tasks. T8 is responsible for collating all completed evidence rows into the final submission.

## 8. Team Contributions

Group G4 of the Digital Witch CSM Programme comprises approximately 30 active learners organised into 8 specialist teams. Each team was assigned tasks aligned with their specialist role.

| Code | Team Name           | Specialist Role                                     | Tasks / Responsibilities                              |
|------|---------------------|-----------------------------------------------------|-------------------------------------------------------|
| T1   | Data Engineers      | HubSpot Configuration & Property Setup              | Part A, No. 1 ★ Hard                                  |
| T2   | Analytics Team      | Data Interpretation & Risk Insight                  | Part A, No. 2 ★ Hard · Part A, No. 3 · Part D, No. 12 |
| T3   | Slack Moderators    | Internal Communication & Team Coordination          | Part A, No. 4 · Part B, No. 5                         |
| T4   | ClickUp Moderators  | Project Management & Task Tracking                  | Part B, No. 6 · Part B, No. 7                         |
| T5   | Website Production  | Digital Presence, Assets & Client-Facing Materials  | Part C, No. 8 · Part C, No. 9 · Part D, No. 13        |
| T6   | Workflow Moderators | HubSpot Automation, Sequences & Process Design      | Part C, No. 10 · Part C, No. 11 ★ Hard                |
| T7   | Presentation Team   | Decks, Stakeholder Comms & Executive Storytelling   | Cross-Team Liaison & Presentation Mastery             |
| T8   | Other Creatives     | Innovation, Local Insight & Value-Add Contributions | Group Reporting · Lagos Creativity · Knowledge Base   |

### NOTE ON TASK DIFFICULTY

Three tasks are designated ★ Hard: Part A, No. 1 (T1) requires technical HubSpot property configuration mapped to the 4 Health Score Pillars. Part A, No. 2 (T2) demands high-complexity analytical synthesis. Part C, No. 11 (T6) requires designing a live multi-branch HubSpot prevention workflow.

## 9. Lessons Learned

---

### 9.1 Never Design for the Demo — Design for the User

The platform was configured for how HubSpot looks in a sales presentation, not for how a delivery driver operates in Mushin at 7am on a Tuesday. Every onboarding must begin with a deep user context assessment.

### 9.2 A Single Champion Is a Single Point of Failure

Any account with only one internal advocate is one resignation away from institutional collapse. Identify and develop at least two champions from different departments at every Enterprise account.

### 9.3 Verbal Complaints Are Tickets — Always

If a customer tells you something is not working on a call and you do not log it, you have not heard it. Every expressed friction point must be converted into a formal HubSpot ticket within 24 hours. If it is not logged, it did not happen.

### 9.4 Silence Is Not Satisfaction

Zero support tickets alongside collapsing usage is not a healthy signal. It means customers have stopped trying to get help because they have already decided to leave.

### 9.5 Automate Your Safety Nets

No CSM can manually monitor every account, every week, for every signal. The Enterprise Account Health Guardian workflow should exist for every Enterprise account from Day 1. Prevention is always less expensive than recovery.

## Appendix A — Health Score Pillar Framework

---

| Pillar                   | Weight   | What It Measures                                                  |
|--------------------------|----------|-------------------------------------------------------------------|
| Product Usage & Adoption | 30%      | Active users, feature adoption, workflows, deals created          |
| Customer Engagement      | 20%      | Emails logged, last CSM call, meeting frequency                   |
| Sentiment                | 10%      | NPS score, renewal probability, qualitative feedback              |
| Support Ticket Activity  | Variable | Formal tickets, verbal complaints — is the feedback loop working? |

## Appendix B — 30-Day Recovery Timeline

---

**Day 1–2 Internal** escalation filed · Churn Recovery Deal created · Account briefing held  
**Day 3 Warm** re-engagement call with Ngozi Eze (Operations Lead)  
**Day 4 Executive** email outreach to COO Chioma Okonkwo  
**Day 7–10 Executive** Business Review — mobile demo, re-engagement commitment secured  
**Day 14 Field**-Worker Training Workshop — mobile-first, all 22 users, new champion designated  
**Day 21 Renewal** negotiation with COO — present recovery data, commercial offer ready  
**Day 28–30 Renewal** close or managed exit — Mutual Success Plan or win-back sequence

## Appendix C — HubSpot Prevention Workflow Summary

---

- BRANCH A: Active Users < 50% → Task created for CSM, due within 48 hours
- BRANCH B: Last CSM Call > 30 Days → Internal email alert to CSM Owner AND CSM Manager
- BRANCH C: Champion Status empty or inactive > 60 days → Escalation Task + Champion At Risk property
- BRANCH D: Renewal within 60 days AND Health Score < 40 → Full executive escalation + Renewal Risk Deal
- OUTPUT 1: Weekly Health Score recalculation logged to account timeline
- OUTPUT 2: Monday morning CSM digest — all accounts sorted by Health Score, red-flagged below 40

TEAM OBSERVATION SUMMARY

Various teams have employed this task and track their deliverables. This undoubtedly has exposed the team members on the use of project management tools for assigning tasks. Furthermore, lessons learned would ensure deep dive on the use of the platform such as in sub tasks, generating templates, and project time tracking

**TEAM OBSERVATION SUMMARY**

The team employed this effort to learn both ticketing and integration of software from Marketplace. This software integration effort is geared towards providing visibility of communication among teams here TSP and CSM. This here acted as a safe assumption, in the case of the Head of Ops, both the raised ticket and her verbal complaints did not yield intervention, leading to their prevailing churn. Reengagement effort after G4HubSpot partners moved from treating CSM as a job function (attaching it to sales) to a standalone Business Function. The story changed with our reengagement effort and CSP plan

#### TEAM OBSERVATION SUMMARY

CSM may not build properties into CRM. Data engineers do. However for start ups or small companies who may not be financially buoyant enough this may present a CSM with such conditions. Our team used this opportunity to learn this skill - led by Data Engineers team which they further found time to teach the wider group and other teams T2 - T8. Hence the above practice helped the learned to acquire additional skill that makes us more sellable.

On the part of Danfo Digital Solutions, these trigger setup help us to be notified of critical changes in the customer office and follow up immediately without being away from the check -in for 73days as is the case. Additionally with the 2-stage trigger when the Champion leaves , through enrichment platforms and pieces of information, this information fed in would trigger action and assign tasks enabling the CSM follow up and close the gap by identifying the replacement

DANFO DIGITAL — KEY EVENTS TIMELINE (MONTH 1 TO MONTH 11)

| Month | Period     | Event                                                                                                   | Impact on Adoption                                                                    | Users Affected  | Health Signal                |
|-------|------------|---------------------------------------------------------------------------------------------------------|---------------------------------------------------------------------------------------|-----------------|------------------------------|
| 1     | Onboarding | Danfo Digital goes live on HubSpot Enterprise. 22 users activated across 3 departments.                 | Peak excitement — all 22 users attempt login. Rotimi champions adoption.              | All 22 users    | ● Healthy                    |
| 1     | Month 1    | Rotimi Adeleke (Head of Sales) designated as HubSpot Champion. Sales team onboarded first.              | Sales team adoption highest in company. CRM logging begins.                           | Sales team (8)  | ● Healthy                    |
| 2     | Month 2    | Drivers & field ops attempt HubSpot Mobile App. Immediate friction reported informally.                 | 4 drivers drop off in first 2 months — platform too complex on mobile field devices.  | Drivers (4)     | ● At Risk                    |
| 4     | Month 4    | Fleet Manager and Dispatch Control disengage. Operations adoption falls to 3 of 9.                      | Operations barely using platform. Only Ngozi and Ops Coordinator still logging in.    | Ops Team        | ● Critical                   |
| 6     | Month 6    | Ngozi Eze raises formal complaint on CSM call: 'feels too complex for our drivers to use on the field.' | CSM takes the call. NO ACTION RECORDED IN HUBSPOT. Ngozi stops logging in same month. | Ngozi Eze       | ● Critical — Process Failure |
| 6     | Month 6    | CSM check-in call notes unlogged. No HubSpot ticket raised.                                             | Critical support failure. Feedback loop broken. No corrective action for 6+ months.   | CSM Team        | ● Critical (Hidden)          |
| 7     | Month 7    | Rotimi Adeleke resigns and leaves Danfo Digital. No successor champion identified.                      | Sales team loses trainer and advocate. Deal creation begins collapsing.               | Sales team (8)  | ● Critical                   |
| 7     | Month 7    | CSM not notified of champion departure. No escalation raised internally.                                | Champion At Risk signal missed. 4-month window of no internal advocacy begins.        | All departments | ● Critical                   |
| 8     | Month 8    | Senior Sales Executive and Sales Executive stop logging in.                                             | Sales adoption collapses from 8 active → 4 active.                                    | Sales team      | ● Critical                   |
| 9     | Month 9    | Sales Analyst and Business Dev Officer disengage.                                                       | Only 2 Sales users remain (Amaka + Taiwo). Basic CRM logging only.                    | Sales team      | ● Critical                   |
| 10    | Month 10   | CX Lead disengages. COO begins evaluating competitor CRM.                                               | Internal advocacy at zero. COO attends rival vendor demo day.                         | Leadership/CX   | ● Critical                   |
| 11    | Month 11   | CSM last check-in: 73 days ago. Only 6 of 22 users active. AI renewal probability: 12%.                 | Platform effectively abandoned. N1.8M ARR at risk. Silent churn in progress.          | Whole account   | ● EXTREME CHURN RISK         |

FEATURE & METRIC ADOPTION BY DEPARTMENT — QUALITATIVE SIMULATION

Adoption levels reflect role literacy, platform complexity, and field conditions. Estimated percentages based on case study qualitative signals.

| HubSpot Feature      | Sales | Operations | CX  | Finance/Tech | Leadership (COO) |
|----------------------|-------|------------|-----|--------------|------------------|
| CRM Contact Mgmt     | 75%   | 10%        | 60% | 40%          | 50%              |
| Deal Tracking        | 70%   | 5%         | 20% | 15%          | 35%              |
| Email Logging        | 65%   | 5%         | 45% | 20%          | 30%              |
| Workflow Automation  | 30%   | 0%         | 15% | 60%          | 40%              |
| Reporting/Dashboards | 25%   | 5%         | 20% | 70%          | 55%              |
| Mobile App Usage     | 20%   | 8%         | 15% | 5%           | 10%              |
| HubSpot Academy      | 40%   | 2%         | 25% | 50%          | 20%              |
| Support Tickets      | 15%   | 3%         | 30% | 25%          | 15%              |
| Integration Tools    | 20%   | 0%         | 10% | 55%          | 25%              |

★ Overall Feature Adoption Score = 18% reflects the weighted average across all 22 users. Finance/Tech & Leadership drive disproportionate feature breadth; Ops/Drivers use <5% of features.

HEALTH METRICS — TARGET vs CURRENT STATUS (NUMERIC)

| Health Metric               | Target Value | Current Value | % of Target | Signal   |
|-----------------------------|--------------|---------------|-------------|----------|
| Active Users (% of total)   | 80           | 27            | 33.8%       | Critical |
| Deals Created / month       | 40           | 9             | 22.5%       | Critical |
| Emails Logged / month (±10) | 20           | 3.1           | 15.5%       | Critical |
| Workflows Active            | 5            | 1             | 20.0%       | At Risk  |
| Feature Adoption Score (%)  | 70           | 18            | 25.7%       | Critical |
| NPS Score                   | 40           | 22            | 55.0%       | At Risk  |
| Renewal Probability (%)     | 85           | 12            | 14.1%       | Critical |

DANFO DIGITAL SOLUTIONS — HUBSPOT ADOPTION SIMULATION

Customer Health Dashboard · Month 11 Assessment · G4 HubSpot Partners · Digital Witch CSM Training  
Simulated account health data showing user dropout patterns across Sales, Operations, CX and Support departments.

| KEY ACCOUNT HEALTH INDICATORS — MONTH 11 |             |                     |                 |              |            |
|------------------------------------------|-------------|---------------------|-----------------|--------------|------------|

★ Support Tickets reclassified Monitor → Critical (Hidden): Ngozi Eze's verbal complaint (Month 6) was never logged — constitutes an unrecorded ticket and a CSM process failure.

# Collective Picture, Risk Linkage & Churn Verdict

*"Danfo purchased a tool for ambition — but it was never made to fit their reality."*

01

## Platform Abandonment

Users 22→6 (73% collapse). Emails at 15% of target. Teams reverted to WhatsApp, spreadsheets, calls.

02

## Lost Institutional Knowledge

Feature adoption 18% — Danfo never progressed past surface setup. When Rotimi left, knowledge left with him.

03

## Broken CSM Relationship

73-day silence near renewal. Ngozi's complaint heard but unlogged. COO evaluating competitor. Silence = exit in progress.

## CHURN VERDICT

# YES. IMMEDIATE & CRITICAL RISK

## 27% Active Users

Non-renewal risk: finance team sees no ROI for ₦1.8M

## 18% Feature Adoption

Value perception risk: no internal case for staying

## 73-Day CSM Gap

Accounts >60 days dark churn at 4× rate

## NPS 22 (Falling)

Word-of-mouth risk: Lagos logistics market exposure

# Root Cause Analysis & CSM Lifecycle Failures

**PRIMARY ROOT CAUSE:** Product-context mismatch unresolved at onboarding — HubSpot Enterprise deployed to field logistics workers without mobile-first adaptation or sector-specific training.

## CONTRIBUTING FACTORS

F1

### Wrong Config for Field Workers

Ngozi Eze (M6): 'feels too complex for our drivers to use on the field.' Desktop-first CRM for mobile logistics workers.

F2

### Single Champion = Single Failure

Rotimi Adeleke was the sole platform advocate. No succession plan. His departure = total collapse of knowledge and advocacy.

F3

### Generic Onboarding in Logistics

Standard HubSpot training. No delivery tracking, no SMS automation, no field-friendly dashboards — nothing for their reality.

## CSM LIFECYCLE MISTAKES

### No action after Ngozi's call (M6)

Complaint logged in memory, not HubSpot. No Task, no follow-up, no adaptation. This single failure cascaded into everything.

### No champion succession plan

Rotimi's departure not flagged or escalated. Champion loss is Category 1 churn signal. Completely ignored.

### 73-day check-in blackout

Account unmanaged during the most commercially sensitive 30-day window before renewal.

### Generic onboarding delivery

No mobile-first design, no delivery workflows, no logistics-sector training. Onboarding designed for the demo, not the drivers.

# Champion Loss — Impact & What Should Have Happened

## THE CASCADE WHEN ROTIMI LEFT

### Sales team lost their trainer

Deal creation: 40+ → 9/month

### Ops frustration had no advocate

Ngozi's complaint → no resolution

### COO lost product insight

Became receptive to competitor outreach

### CSM lost primary contact

Check-ins became harder to schedule

## WHAT SHOULD HAVE HAPPENED — WITHIN 5 DAYS

Contact COO — acknowledge transition, request stakeholder mapping call

Identify 2–3 replacement champion candidates across Sales, Ops, CX

Schedule Champion Onboarding — transfer Rotimi's institutional knowledge

Log 'Champion At Risk' flag in HubSpot — trigger internal escalation

Increase check-in cadence: monthly → bi-weekly for 60 days

*RECOMMENDED: Nominate Ngozi Eze (Ops Lead) as new champion — she knows the pain points, leads the team that needs the platform most, and has shown willingness to engage.*

# 30-Day Recovery Sequence & HubSpot Tracking Tools

|                                                                                                                                                             |                                                                                                                                                 |                                                                                                                                                           |                                                                                                                                                                                                                                                                                                              |

# Tailored Re-Engagement Strategies — Danfo's Context

## 01 Mobile-First Logistics Playbook

### Field-First · Logistics Sector

Build a Danfo-specific Field Operations Playbook for HubSpot Mobile App — delivery confirmation, client updates, and communication triggers from a smartphone in under 60 seconds.

Directly resolves Ngozi Eze's stated complaint. Repositions HubSpot as a driver's tool, not a manager's dashboard.

#### HubSpot:

HubSpot: 5-field Contact view · Mobile push notifications · 'Delivery Completed' auto-log form

## 02 Internal Champion Programme

### Champion Loss · Succession

Nominate Ngozi Eze as lead champion. Provide: bi-weekly CSM office hours · HubSpot Academy Certification · custom Danfo Ops Dashboard she can present to the COO · direct WhatsApp channel to CSM.

Builds depth so one departure never again collapses adoption.

#### HubSpot:

HubSpot: Super Admin read access · Champion Status custom property · champion reporting views

## 03 Lagos Logistics ROI Story

### Business Value · COO Buy-in

Build a live ROI dashboard: deliveries tracked, client relationships managed, time saved. Present to COO Chioma as a data gift — not a sales pitch.

Shows ₦1.8M value in terms the board understands — and that no competitor demo has shown her yet.

#### HubSpot:

HubSpot: Custom Report — Contact Activity + Deal data · PDF auto-sent to Chioma monthly

# HubSpot Prevention Workflow — Enterprise Account Health Guardian

## WORKFLOW: "Champion Departure Alert" + "Enterprise Account Health Guardian"

|          |                                                                 |
|----------|-----------------------------------------------------------------|
| TRIGGER  | Every Monday 8am · All Enterprise accounts                      |
| BRANCH A | Active Users <50% → Task for CSM · Due 48hrs                    |
| BRANCH B | Last CSM Call >30 Days → Email CSM Owner + Manager              |
| BRANCH C | Champion Empty or Inactive >60 Days → Escalation Task           |
| BRANCH D | Renewal <60 Days AND Score <40 → Full C-Suite escalation        |
| OUTPUT   | Weekly Health Score + Monday CSM Digest — all accounts by score |

Had this been active: alerts at M4 (users <50%) · M6 (Ngozi complaint) · M7 (Rotimi left) · M9 (check-in overdue) — crisis prevented 5 months earlier.

## Live HubSpot Workflow — Champion Departure Alert

This workflow is LIVE in G4 HubSpot Partners account — status: ON. Trigger enrollment for companies → Create Task → Send Internal Email → End.

# Stakeholder Communications — Internal Escalation & Re-engagement

## TASK 12 — Internal Escalation Email (≤300 words)

**To:** [Head of Customer Success]  
**From:** [CSM Name] · G4 HubSpot Partners  
**Subject:** 🚨 **Danfo Digital — Critical Churn Risk | ₦1.8M | Renewal in 30 Days**

Hi [Name], I am escalating Danfo Digital as a critical churn risk.

Health: Active Users 27% · Feature Adoption 18% · Last CSM Call 73 days ago · Renewal Prob. 12% · NPS 22 · 1 unlogged complaint.

Risk: Champion Rotimi departed 4 months ago (unreplaced). Ops Lead complained 6 months ago (no action). COO attended competitor demo last week.

Proposed Plan: Day 1–3: Brief + Ngozi outreach · Day 4: COO email · Day 7–10: EBR · Day 14: Training · Day 21: Renewal · Day 28–30: Close.

Requesting: EBR attendance (Day 7–10) + commercial concession authorisation.

✓ ~270 words — within 300-word limit · Professional · Data-driven · Action-oriented

## TASK 13 — Re-engagement Email to Ngozi Eze (≤250 words)

**To:** Ngozi Eze — ngozi.eze@danfodigital.ng  
**From:** [CSM Name] · G4 HubSpot Partners  
**Subject:** Checking in — something we built for Danfo's team

Hi Ngozi, I hope the team is keeping up with Lagos delivery season!

I've been thinking about our conversation — you raised something that stayed with me: the platform felt too complex for your drivers in the field. We should have acted faster. I'm sorry we didn't.

Here's why I'm writing: we've built a simplified mobile workflow for logistics field teams — delivery confirmation, client updates, from a smartphone in under 60 seconds.

I'd love a quick 20-minute call — no slides, no pressure. Just a look at whether this solves what you raised.

Would any time next week work? I'll follow your lead on timing.

Tone: ✓ Warm ✓ Honest ✓ Consultative ✓ Non-transactional ✓ Low-pressure close · ~240 words

# Tools Used — G4 HubSpot Partners CSM Project

|                                                                                                                                                                                                |                                                                                                                                                                                              |                                                                                                                                                                                              |                                                                                                                                                                                             |

# 5 CSM Lessons That Will Last — Danfo Digital Case

## Design for the User, Not the Demo

The platform was configured for how HubSpot looks in a showroom — not how a delivery rider operates in Mushin at 7am. Every onboarding must begin: 'Who actually uses this, on what device, in what environment?'

## One Champion = One Point of Failure

Any Enterprise account with only one internal advocate is one resignation away from institutional collapse. Build at least two champions from different departments — always.

## Verbal Complaints Are Tickets — Always

If a customer tells you something is not working and you don't log it, you haven't heard it. Every friction point on a call becomes a formal HubSpot ticket within 24 hours. If not logged — it didn't happen.

## Silence Is Not Satisfaction

Zero support tickets alongside collapsing usage is not a healthy signal. It means the customer stopped asking for help because they had already decided to leave.

## Automate Your Safety Nets

No CSM can manually watch every account every week. The Enterprise Account Health Guardian workflow should exist from Day 1. Prevention always costs less than recovery — and far less than churn.

# Thank You.
